

CUSTOMS DECLARATION LETTER

To Whom It May Concern:

This letter is to inform those interested that OneOme's RightMed 1mL Collection Kit (OCR-100) is composed of a corrugated box containing a collection tube. It is used for transporting collection kits from a patient back to OneOme for genetic testing.

The only other components inside are a leak-proof plastic specimen bag, an absorbent cloth, and a package insert. The harmonized code is 3001.20.0000. These goods are being return to OneOme, the original owner.

DNA Genotek (3000 - 500 Palladium Dr, Ottawa, Ontario K2V 1C2 Canada), is the manufacturer and supplier for the OneOme sample collection kit. Universal precautions are taken into consideration and are included with the sample collection kit.

Please feel free to contact us with any further questions.

Best regards,

OneOme Support
